Internal Similarity Self-Check

Smart Aerial Response — Design of Smart Cities course project · generated 2026-11-02

This is not the official plagiarism report. It is a local pre-check run by the team. The official similarity report for submission must be obtained from the VIT library's Turnitin / iThenticate check, which also compares against the web and published literature.

Method

Each document is converted to plain text (pandoc), its reference list is removed, and the text is split into overlapping sequences of 6 consecutive words (6-grams), ignoring case and punctuation. The overlap percentage is the share of the document's 6-grams that also occur anywhere in the comparison source. Consecutive shared 6-grams are merged into passages, and the longest passages are listed so they can be checked or rewritten. Shared author names and affiliation lines (school, institute, city) are expected and are not a concern. Overlap with the team's own earlier course deliverable is self-reuse within the same course project.

Results

Document	Compared with	Overlap	Shared 6-grams	Flag
IEEE research paper	A.D.A.P.T. journal manuscript (under review)	1.09%	46 / 4210	ok
IEEE research paper	Earlier course report (deliverables/)	0.10%	4 / 4210	ok
IEEE research paper	Course project report	2.78%	117 / 4210	ok
Course project report	A.D.A.P.T. journal manuscript (under review)	0.08%	6 / 7794	ok
Course project report	Earlier course report (deliverables/)	0.64%	50 / 7794	ok
Course project report	IEEE research paper	1.78%	139 / 7794	ok

Flag: ok < 5%, check 5–15%, high ≥ 15%.

Longest shared passages

IEEE research paper vs A.D.A.P.T. journal manuscript (under review)

1. **48 words:** grade 1 school of computer science and engineering school of computer science and engineering school of computer science and engineering school of computer science and engineering vellore institute of technology vellore institute of technology vellore institute of technology vellore institute of technology vellore institute of technology vellore india vellore india vellore india
2. **7 words:** the school of computer science and engineering
3. **6 words:** vellore india vellore india vellore india

IEEE research paper vs Earlier course report (deliverables/)

1. **8 words:** runs an integrated command and control centre iccc
2. **6 words:** food water and medicine to people

IEEE research paper vs Course project report

1. **18 words:** flood resilient siting of iot drone docks for smart city relief a scenario study of varanasi and kanpur

2. **13 words:** the share of training scenarios in which c is dry and clear of
3. **12 words:** iccc plan 209 1 1800 s 1 0 00 total 9 61
4. **10 words:** dr swarnalatha p ajay thomas dharani i s sukant g
5. **10 words:** against 49 and 45 for docks sited from a single
6. **10 words:** and the maximal covering location problem of church and revelle
7. **10 words:** is the open source a d a p t system
8. **9 words:** professor grade 1 school of computer science and engineering

Course project report vs A.D.A.P.T. journal manuscript (under review)

1. **8 words:** grade 1 school of computer science and engineering
2. **7 words:** the school of computer science and engineering
3. **6 words:** school of computer science and engineering

Course project report vs Earlier course report (deliverables/)

1. **15 words:** smart aerial response an autonomous uav framework for resilient flood emergency management in smart cities
2. **15 words:** smart aerial response an autonomous uav framework for resilient flood emergency management in smart cities
3. **15 words:** smart aerial response an autonomous uav framework for resilient flood emergency management in smart cities
4. **9 words:** abstract floods are the most frequent disaster in indian
5. **9 words:** all drones at once on the flood map with
6. **8 words:** city s integrated command and control centre iccc
7. **8 words:** for a whole city in about a minute
8. **8 words:** runs the real planner and replays the swarm

Course project report vs IEEE research paper

1. **18 words:** flood resilient siting of iot drone docks for smart city relief a scenario study of varanasi and kanpur
2. **13 words:** the share of training scenarios in which c is dry and clear of
3. **12 words:** iccc plan 209 1 1800 s 1 0 00 total 9 61
4. **10 words:** against 49 and 45 for docks sited from a single
5. **10 words:** and the maximal covering location problem of church and revelle
6. **10 words:** is the open source a d a p t system
7. **9 words:** professor grade 1 school of computer science and engineering
8. **9 words:** share of drop points served as the flood rises
